Office Action Summary	Application No. 10/820,417	Applicant(s) KAWASHIMA ET AL.	
	Examiner C. J. Arbes	Art Unit 3729	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 3729

For the record the term "insulating" is misspelled in at least claim 17.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language ... the wiring patterns under conditions such that at least one of (a) or (b) does not occur: (a) the composite sheet is deformed to contact both the wiring layer and the insulating layer, and (b) the porous film is impregnated fully within the adherent sheet... in claim 1 is held to make this claim unclear, vague and indefinite. First the claim is drawn such that the recitation is a negative and this in itself makes a claim which is not understood and hence gives the claim lack of clarity, definiteness and distinctness. Even if this statement is not correct how can Applicants surmount the issue of supposing that both (a) and (b) does not occur and yet carry out the "pressing" step recited in the ultimate indent in said claim 1. That is there would nothing which can be completed. It cannot be understood what Applicants intend when they draw such claims. The metes and bounds of these claims are not properly nor adequately defined and hence are held to be properly rejected under 35 U.S.C. Section 112 (2nd Para).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukutake et al (Pat No. 5,473,118); hereinafter Fukutake et al.

Fukutake et al teach a printed circuit board with an overlay film. The film consists of a composite porous fluoropolymer film coated with a thermoplastic or heat curing adhesive. Figure 2 shows a dielectric substrate, a printed circuit thereon and an overlay film of the porous fluoropolymer film. (Cf Col 5). Adhesive can be impregnated into the pores of the film by means of heated rolls (Cf Col 6). The overlay film can be laminated to a printed circuit board using a temperature of about 200 degrees Celsius with a compressive stress of about 10 KG/cm (2). (Cf Col 8)

Claim 26 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
